

BETTER BY DESIGN... MUST BE AIRTEX.

OE or better performance from an Original Equipment Supplier. The latest advancements in fuel delivery technology are built-in to every Airtex Fuel Pump.

Improved Vehicle Harness Connector
eliminates known OEM problem

Insert-Molded Check Valve Housing
superior performance and flow over original design

Patented Check Valve Technology
flow-through design reduces noise

Upgraded Seals
consistent pressure and superior performance in multiple fuel blends

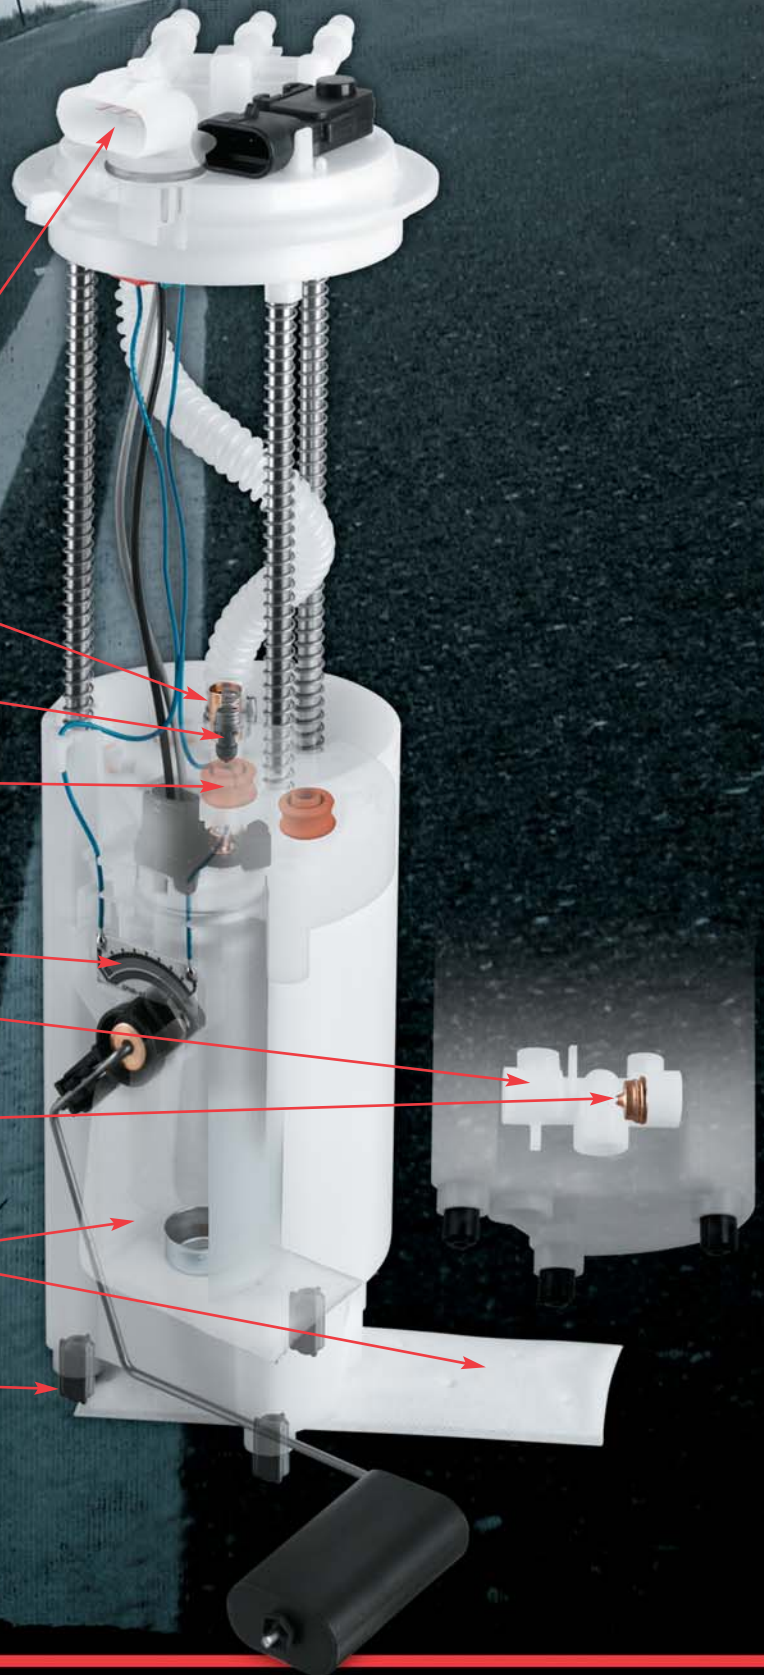

Ceramic Sender Card
ensures accurate fuel gauge readout

Redesigned Jet Pump Manifold
increased jet pump efficiency for consistent fuel delivery

Brass Jet Pump Orifice
precision machined for consistent, reliable performance

Gradient Density, Dual-Zone Strainers
superior contaminant filtration for longer pump life

Isolator Feet
improved noise damping over OEM design
